

# Wafer Type Check Valve Metal

## Construction

The GEMÜ ZRSK wafer type check valve is available in metal and the body, disc and seal can be chosen from various materials. The valve is clamped between two flanges and has a flange seal. It self-centres in the flanges between the bolt circle.

## Features

- Suitable for inert and corrosive\* liquid media
- The valve works according to the swing check principle
- Can be selected with or without spring return
- Horizontal or vertical installation possible

## Advantages

- Nominal sizes from DN 32 to 600
- Eye bolts as installation aids
- Weight and space saving design
- Very simple construction - low maintenance

\* See information on working medium on page 2

## Technical data

### Working medium

Corrosive and inert liquid media which have no negative impact on the physical and chemical properties of the body, disc and seal materials.

### Perm. temperature of working medium

NBR	-10 ... 90 °C
EPDM	-10 ... 120 °C
FPM	-10 ... 150 °C
PTFE	-10 ... 200 °C

### Maximum operating pressure acc. to the Pressure Equipment Directive dependent on nominal size and material (temp. 20°C)
