

High Purity Diaphragm Valve, Plastic

Construction

The GEMÜ 600 HP 2/2 way valve has a low maintenance piston actuator which can be controlled by inert gases. It has a stroke limiter, a manual override and an integral optical position indicator as standard. Normally Closed, Normally Open and Double Acting control functions are available.

Features

- Suitable for inert and corrosive* liquid and gaseous high purity media
- All medium wetted parts and the housing are made of high quality plastic materials
 - Valve body: PFA-Inliner/PVDF-Outliner (carbon-filled)
 - Diaphragm material: PTFE/EPDM
 - Actuator: PP glass fibre reinforced
- Control connection in flow direction as standard, therefore installation in restricted spaces possible
- Manufactured under cleanroom conditions

Advantages

- Good K_v value
- Minimal deadleg
- Optional flow direction, will seal in either flow direction up to full working pressure
- Due to its design particularly suitable for polishing agents and slurries
- Optional mounting position
- Optional accessories
 - Electrical position indicator with microswitches or proximity switches
 - Pneumatic or electro-pneumatic positioners
 - Control air adapter for pilot valves according to Namur

Technical data

Working medium

Corrosive, inert, gaseous and liquid media which have no negative impact on the physical and chemical properties of the body and diaphragm material.

Control medium

Inert gases

Required control pressure see table below

Max. perm. temperature of control medium 40°C

Working temperature

Max. 90°C (194°F), higher temperatures upon request

depending on working pressure

Ambient temperature

60°C (140°F)
